| <input type="checkbox"/> | Stylist Grid Range | 278-279 |

An elegant range of high quality solid brass plate electrical wiring accessories. Offering a wide choice of attractive finishes designed to complement both contemporary and traditional decor styles. The high quality solid brass flat plates offer minimal projection and are finished to the highest standard. This superior finish is protected by the application of hard wearing, high grade electrophoretic or multi-resin lacquers to ensure that Flat Plate Collection accessories retain their good looks for many years. All of the attractive plate finishes are enhanced by the provision of metal rockers or toggles as standard. Switch assemblies incorporate MK grid switches. Grid system construction also ensures that the Flat Plate Collection offers high levels of flexibility to architects, interior designers and installers. Heritage Stylist Flat Plate Collection complies fully with relevant British Standards.

The Heritage Stylist range is designed to provide great flexibility in meeting the specification requirements of both domestic and commercial installations. From time to time however non-standard products will be required to meet the needs of designer and installers. Based on MK and Crabtree grid systems, Stylist flat and cast plate ranges are ideally suited to meeting such special requirements. A vast range of bespoke products is available. Based on standard plate sizes and designs these include such items as Data/Communication and Audio/Video outlets, multi-dimmer arrangements and kitchen appliance control centres. Heritage customer service staff will be pleased to give advice and to quote for the supply of non-standard products given full application details.
